

Curvo Analytics Suite

Gain Deep, Data-Driven Insights for Better Contracts

PROACTIVELY IDENTIFY AND CAPTURE OPPORTUNITIES AT SCALE

Managing clinical spend at scale has become next to impossible. Hospital supply chains struggle to understand millions of data points on top of dealing with talent and time shortages. Meanwhile, too many contracts leave money on the table. This is the problem Curvo Analytics were designed to solve.

Quickly Customize, View, Share and Act on Spend Analytics

With the robust Curvo Analytics Suite, users can monitor their clinical spend like never before. Fast visualizations and curated insights keep you informed about pricing, usage, and categories. Know where you'll get the most value and prioritize your efforts.

Customizable Category Analytics

Quickly understand implant and PPI spend opportunities by category, vendor, benchmarks, and more.

Configurable views and unbiased insights drive ongoing savings across many categories.

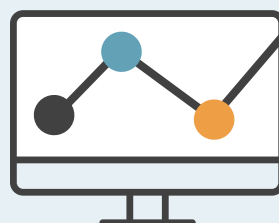

Detailed Procedure Analytics

Understand how construct components come together by physician, procedure, and supplier.

Monitor changes in procedures and constructs, and earn clinician buy-in.

Contract and Rebate Analytics

Easily stay on top of day-to-day compliance and financial performance of new contracts to catch problems early and avoid savings erosion.

Multiple Spend Views

Configurable spend views track progress and show where expected savings are going off track.

Proactively monitor spend to find opportunities in price parity, price creep and utilization changes.

CUSTOMER SUCCESS

“Supply chain is drowning in data but starving for information. Curvo does all the heavy lifting and identifies the items. Then it’s easy to go to the distributor or manufacturer to sort it out. I call Curvo my safety net.” **ASSISTANT DIRECTOR FOR PROCUREMENT AND STRATEGIC SOURCING, LARGE UNIVERSITY HEALTH CENTER**
